EDUCATION

Poznan University of Technology
Mechatronics (BEng) | 10.2019 - 02.2023
- Thesis: Project of a 3-axis milling machine for aluminum
- AKAI Member - Academic Web Application Research Group

PROFILE

I'm a frontend developer with 2 years of commercial experience in this field. During this period I've successfully developed scalable and user-friendly applications that helped with achieving the company's business goals. Even though I specialize in frontend, I have also developed some backend for my personal projects so I'm not afraid of touching it.

WORK EXPERIENCE

Frontend Developer
SignalOS | 03.2024 - ongoing
React.js, Next.js, React Native, TypeScript, Material UI, Vitest

- Developing admin dashboards, mobile apps and email templates with help of React, React Native and Typescript,
- Writing unit/integration tests using Vitest and React Testing Library,
- Refactoring legacy code,
- Collaborating with Product Owner and Designer to achieve the best possible result.

Frontend Developer
Mobile Marketing Center | 01.2023 - 12.2023
React.js, Redux, TypeScript, Styled Components, SCSS

- Developed application for learning foreign languages with technologies such as React, TypeScript,
- Created responsive and effective websites,
